

**SOUTH
DAKOTA
MINES®**

An engineering, science and
technology university

SCIENCE, TECHNOLOGY, & SOCIETY DEGREE

Combining the strength of South Dakota Mine's science & engineering programs with an understanding of the human & societal dimensions of technological change & scientific advances.

Designed for students wishing to focus on careers relating to the environment and sustainability or policy and law, the STS program prepares students for admission to law school or graduate school, and for careers in public policy, public service, science communication, environmental science, science and technology firms, non-profits, science education, the military, and law enforcement. As a STEM-related degree, our STS program prepares students for success by equipping them with a winning combination of communication, analytical, critical thinking, and problem-solving skills.

Build Your Future!
